(54) Title: ANAEROBIC ADHESIVE COMPOSITION

(57) Abstract: The present invention relates to an anaerobic adhesive composition and more particularly, to the anaerobic adhesive composition which blends a difunctional carboxylic acid, expressed by formula (I), to the anaerobic adhesive

composition comprising monomers, oligomers, inhibitors, oxidizers, reducers and thickening agents, showing some useful physical properties; a) the rapid velocity in a hardening reaction, b) the good stability in long-term storage, and c) the break-loose torque which is sufficiently applied in the assembly of bolt-nuts, precision apparatuses and electric/electronic parts, wherein R is $(\text{CH}_2)_n$ or $\text{CH}_2\text{C}(\text{=CH}_2)$ and n is an integer in the range of 2 to 10.
